

Data Quality Report – Active OFS Members

Before the conversion to the new database, we had an effort to clean up data on the old database before it was moved over. There are still some remaining issues that should be the subject of ongoing data quality improvements. This report allows Regional Admins or NEC users with edit access to search, view and correct data issues by Region. The link to this report can be found on the National Summary Page and the Region Summary Page in the list of functions below the org unit summary. It is highlighted in blue.

Search Page

The Data Quality Report for Active OFS Members allows the Regional Admins to search on all or specific data issues in their regions. The “All” selection for the Region is available to users with NEC edit privileges.

Searching with “All” and no criteria selected will return any data issues with members of fraternities for which you have edit privilege. For users with permissions to only one region, no selected is needed. For user with multiple regions, you can select a specific region to narrow your search.

the user would select one of the error conditions listed in the search criteria. You can select more than one, but doing that would narrow your results to records that had all the selected conditions. Thus, it is recommended that the user select one criterion at a time.

The first section select will select all the active members in inactive fraternities in the region. It is recognized that a newly deactivated fraternity may still have some active members in it while they are discerning where they want to transfer to. These records may or may not be data quality issues.

The rest of the criteria are common issues involving missing or “default” dates or data for required fields, or bad address or bad email, which were determined in failed mailings or email messages.

View Detail

Clicking on View Detail will bring the user to a page displaying the data the individual member selected. The data can be corrected on this page, or just viewed. Click “BACK” if you choose not to make changes at this time.

This page is not the full member record. It only contains those fields that are considered in the error search. You can “Search Again” to return to the search page. On the record displayed below, we have highlighted the fields that are in error for documentation purposes. The user interface will not have this highlighting.
